RED TRAVERTINE

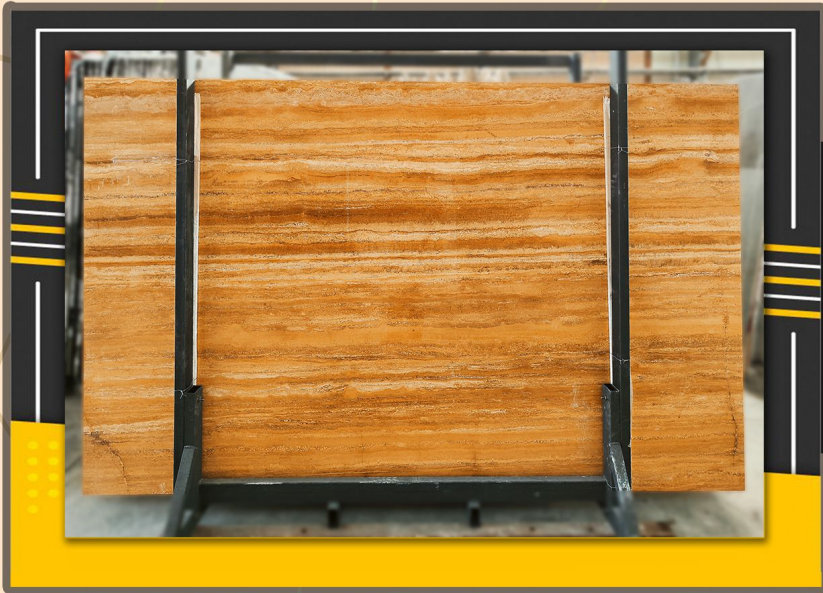

Very Durable
High Resistance to cold
High Versatility

Red Travertine

Red Travertine is one of the most famous Travertines among Persian travertine stones. This type of travertine, which is known in European countries as (Red Soraya), has a cheerful and beautiful bright color for landscaping parks and gardens, villas, and luxury facades of the buildings. Red travertine is produced in two forms, wavy and waveless, and due to its color, can be used to separate different parts of the interior floors of the buildings or the courtyard as separator lines

YELLOW TRAVERTINE

OWN
QUARRY

Yellow Travertine

Yellow travertine is a beautiful type of natural stone that is known for its lemon color. It is primarily sourced from quarries in Iran. This type of travertine is highly acclaimed for versatility and can be used for both interior and exterior applications, making it ideal for wall and floor installations. Featuring a warm yellow background with veins in darker shades, yellow travertine offers a unique and visually appealing appearance. It can be processed into various finishes, including polished, brushed, etc. providing endless design possibilities.
